One day Educational tour for NRSTC Seb's Tribal schools in Jawadhi

Once again we are here to celebrate our success of partnerships with the Government departments. We are happy to say that the District Education Department and SSA had arranged a study tour for the students in all our tribal schools. The one day trip for our children was a carefully planned combination of site visit to Vellore fort and to have hands on learning experience by visiting the Vellore Science Center.

For most of the students, this was their first trip on a bus down the hill into Vellore. Students were excited and also enriched their knowledge.

Initially they were addressed by the APO of education department. He motivated the children to spend the day by learning and enjoying their visit.

At the Science Centre, they were able to learn concepts of science through simple models and experiments led by the Science Centre resource persons who introduced students to simple principles of science which our children were able to connect with. Students tried doing some of the experiments and discussed with their teachers. They were also able to connect their lessons from their classroom learning.

The experience at 3D theater was thrilling and fun..

In the afternoon they visited the Vellore fort museum. All the exhibits in the museum was very informative. Children were able to understand the history and they also interestingly took notes on the displays at the museum.

At the end of the day the children gave their feedback by explaining their learnings from the science center and the Museum.

Mr.Jyotheeswara Pillai the APO from the Education Department along with his team took a personal interest to plan this program so meticulously and making the educational tour very memorable for both the NRSTC SEB'S students and their teachers. We thank them for this amazing opportunity. He encouraged the children to concentrate on science subjects. He challenged the teachers and students to participate in district science exhibition and the ASPIRE competitions to be held in the district in December and win a scholarship.
